

Features

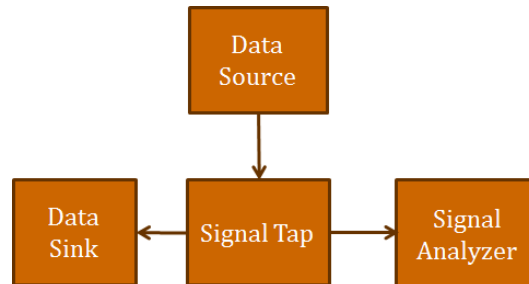

- Two 50 Ohm power dividers on a single PCB
- >10 Gbps signal capable: uses FR-408 Dielectric
- SMA connections to length matched high speed lines
- Rugged through hole right angle SMA connectors
- Used for tapping off differential lines for in-system analysis
- Output signals are -6 dB copies of the input
- RoHS compliant

Differential Signal Tap Block Diagram

Typical Application

Connect device to for signal or protocol analysis

Uses

- Protocol analysis
- Protocol development
- Signal integrity evaluation

What's In the Box

- Differential Signal Tap board
- Developer's CD-ROM
 - User's Guide
 - Schematics
 - Bill of materials

Ordering & Contact Information

- Differential Signal Tap part number: *DIFFSIGNALTAP*
- Sales phone: (937) 985-4140
- Sales email: contactus@group14tech.com
- Web: <http://www.group14tech.com>
